

**About this App-**

The goal is to provide a platform for the general public to share information on Drug Trafficking with NCB(Narcotics Control Bureau) anonymously.

ANAAM is a mobile application developed by Chirag Patel / Divyank Singh / Ashish Bibyan / Hansal Kothari / of Gurukula Kangri (Deemed to be University), Haridwar-249404, which acts as a one-way bridge from the general public to the NCB Department i.e You can share the details about the incidents of Drug Trafficking around your neighborhood with the Department without them knowing your true identity. It uses the Tor network that hides your personal information.

**Data Safety-**

Data protection is our top priority, to do so we have integrated **Tor** which is a network of virtual tunnels that improves your privacy and security on the Internet. into our app which provides an impenetrable defense that safeguards your personal information (like IP address or location) from the department. It only sends the information you want to send to the Department, your personal information never leaves your device.

**Features-**

Provides a safe platform for the users to give information about Drug Trafficking to NCB Department without revealing their true identity to prevent the youth from getting influenced by the drugs.

**Permissions required by the app-**

**Camera** permission for capturing live evidence

**Location** permission for pinpointing the location of the trafficking.

**Storage** permission is required to select and upload your files.

**Microphone** permission is required for capturing the audio of the offense.

**Network** permission is required to connect to Tor network.

**Internet** permission is required to connect to the server

**App info-**

Version - 1.0

Required os- Android or iOS

## Privacy Policy

ANAAM, use and protect the data that you provide to us, or that is otherwise obtained or generated by us, in connection with your use of our cloud-based messaging services (the "Services"). For this Privacy Policy, 'we', 'us', and 'our' refers to ANAAM, and 'you' refers to you, the user of the Services.

Our app allows you to share information about "drug trafficking" anonymously with the NCB( Narcotics Control Bureau).

## TECHNICAL BACKGROUND

The app has been built on Flutter(an open-source software development kit, a cross-platform development tool that can use the same code base to develop iOS and Android applications). Anonymity is provided by the use of TOR which works on the principle of onion routing. To filter out legitimate information the use of machine learnings email spam detection algorithm will be used. Further ramifications will continue to develop to enhance the performance.

## PRIVACY PRINCIPLES

We have the following fundamental privacy principles :

- Keeping the user's identity anonymous.
- We promptly provide information provided by you to respective government agencies for prompt action.
- Information apart from identity, like location is kept private and secure.
- The most crucial aspect of ANAAM is " anonymity ", TOR comes to aid in this prospect, which works on the principle of onion routing.

## PERMISSION AND DEPENDENCIES

- Internet access: enabled to use of Anaam which will be mandatory to fill the form and submit it to NCB. Without internet access, you will not be able to access TOR VPN.
- Camera: necessary to capture evidence in the form of photos or videos.
- Microphone: required for recording the audio evidence, helpful in capturing the guilty.

## LINKS TO OTHER SITES:

Our app may provide you with TOR links which may collect the information you want to submit regardless of your identity.

## SUPPORT:

If you have any queries, concerns, or complaints about collecting or using your personal information under this privacy policy. Please contact us at.....com

## CHANGES TO THIS POLICY

We may revise this policy from time to time without any further notification. The most current version will govern our use of the information provided by your anonymous account.
